

Physics

Inventors in the field of physics make the unbelievable a reality. From microscopes that allow us to view objects on the atomic scale to photonic laser thrusters that can power interplanetary travel, physics is at the core of many innovations. Physics also includes innovations in electromagnetics, which allow bullet trains to float and bring invisibility cloaks from science fiction to reality.

Our patent practitioners servicing this area have formal academic training in applied and theoretical physics, mathematics, advanced electromagnetics, optics, material science, aerospace engineering, nuclear engineering, and mechanical engineering.
