Brad Barger's practice focuses on the procurement and protection of intellectual property rights, including patents, trademarks, trade dress, trade secrets, and copyrights. He has experience pursuing patent protection within a broad array of subject matters, including computer systems, telecommunications, software, plasma display circuits, mining and drilling equipment and electronics, synthetic diamond manufacturing, bio-medical devices, and many other technology fields.

Mr. Barger's practice includes representing companies in many different stages, including companies in their earliest start-up stages and on up to some of the largest technology companies in the world. As part of that representation, Mr. Barger has provided strategic and leadership advice and assisted companies in developing aggressive IP strategies that protect the companies' innovations and maximize the value of the companies' IP portfolios.

As a law student, Mr. Barger received the ABA-BNA Award for Excellence in the Study of Intellectual Property law and was selected by faculty and peers to receive the J. Reuben Clark Award for academic excellence, integrity, and service. Mr. Barger also received multiple honors for his performance in moot court and negotiation competitions and was invited to represent the law school as a member of the J. Reuben Clark National Moot Court Team. Additionally, Mr. Barger held leadership positions by serving as a Lead Dean's Fellow, on the Student Bar Association Board, and as a member of the Moot Court Board.

Prior to law school, Mr. Barger studied electrical engineering at Brigham Young University.
